The Gnatcatcher Trail overgrowth has already been listed in the matrix. We haven't inspected the unnamed access path from Gnatcatcher Tr. up to El Portal Tr., but I know that path is overgrown, but that is one of those splits trails. We should decide if we want to re-open all these shortcut trails or let them remain hidden by the overgrowth.

Hello Lili,

I'm forwarding an Ocean Trails Reserve maintenance request from the public below. We'll also add it to our new log.

Thanks,
Katie

Ms. Lozano,
I frequently walk the trails southeast of Trump's Golf Course. Gnatchatcher and the connecting path up to E. Portal are so overgrown in places, they are almost impassable. Before we lose them entirely, please get some crews out to trim them.
